

# boombottle lite

Boombottle Lite is a speaker system made from a waste plastic container. The plastic bottle is air sealed, waterproof and rugged, yet has a internal volume that makes it a nice speaker enclosure. When it is attached with speaker drives, it becomes a portable speaker, perfect for sharing music and the idea of upcycling.

## Pairing your mobile device

When you power on your speaker for the first time, the speaker automatically searches for your mobile device.

- 1 On your device, turn on the Bluetooth feature. **Tip:** The Bluetooth feature is usually found in the Setting Menu.
- 2 Select "Boombottle" from the device list.
- 3 Once paired, you hear "Doo Doo" sound and the status light change from blinking to steady white.

 **Rechargeable batteries are strongly recommended. Dispose of batteries according to your local environmental laws and guidelines.**

## Connect with headphone cable

The headphone connector accepts 3.5mm headphone plug.

- 1 Using a headphone cable, connect your device to the headphone connector on your speaker.
- 2 Now the speaker will play headphone input and Bluetooth input will be disabled.

 **The headphone connector has to be unplugged to enable the Bluetooth connection.**

## 6-month Limited Warranty

Boombottle is designed not only to let you enjoy music everywhere you go, but also draw people's attention to you. However, just like most electronic products, sometimes it does have technical problems due to manufacturing defects. This is why we offer a six-month limited replacement warranty, from purchase date, against manufacturer defects on each Boombottle we sell.

### How does it work?

If you find this product defective within the limited warranty period, please send in an e-mail to [mail@kevin-cheung.com](mailto:mail@kevin-cheung.com)

1. **Give details of the problems** you are experiencing. (Preferable with pictures or videos)
2. Attach with a scanned **proof of purchase**.
3. Provide the **serial number** which can be found on the bottom of the Boombottle.

In case the identified defect is due to workmanship, we will arrange a free replacement or repair depending on the situation.

This warranty does not apply to cases of abuse or misuse of the product, ordinary wear and tear, incorrect connection, act of God or unauthorized repair.

### What if warranty expired?

If this product is found defective or damaged by accident after the limited warranty period and you would like to have it repaired, you can still send in an e-mail to [mail@kevin-cheung.com](mailto:mail@kevin-cheung.com)

1. **Give details of the problems** you are experiencing. (Preferable with pictures or videos)
2. Provide the **serial number** which can be found on the bottom of the Boombottle.

Depending on the situation and spare parts we have, we can offer a repair service at the cost **no greater than 50%** of the current or latest retail price of the product.

### Cautions

- Using Boombottle limits your ability to hear noises around you, regardless of the volume. Please use with caution. When using this device please be considerate and do not disturb others nearby.
- Do not drop, press, sit on, or allow Boombottle to have direct contact with water or heat.
- Turn the volume control cap with extra care. Stop turning when it reaches both ends.

## Controls

\* Turn the volume control cap with extra care.  
Stop turning when the knob reaches both ends.

## Powering On

Plug in Boombottle Lite into a USB power supply or insert 4 AA rechargeable batteries, following the indicated + & - direction. Then press the switch to On.

## FAQ

### How long will the batteries last?

4 fully charged rechargeable AA batteries will last around 4-5 hours with normal usage.

### Can Boombottle connect to microphone?

Possible, the simplest way would be connect to a smartphone with a microphone application that uses the built-in mic on the phone and output the signal through the speaker.

### Where to put the battery cover while plug into USB power?

The velcro on the back is designed to hold the cover while plug in to the USB power supply.

### Adjustable shoulder strap

Velcro is attached at both ends for easy adjustment of length.

## Where does the Boombottle Lite come from?

This is a collaboration between the designer, different agencies and NGOs to bring this unique product to you. Boombottle Lite is made in Hong Kong from waste materials produced locally. From sourcing the materials to the assembly line, we are making a positive impact on society one step at a time.

**Ink bottle** is collected from a fabric printing machine at TML Apparel Limited.

**Felt carpet** is leftover from Hong Kong Convention and Exhibition Centre.

## otaki Speaker Components

are developed by Otaki (HK) Ltd. Based in Hong Kong, they are specialised in audio technology.

### Assembly and production by

Sheltered Workshop at St. James' Settlement. It is Hong Kong's first sheltered workshop established in 1973 to provide employment services to people with disabilities.
